Response provided under: Environmental Information Regulations 2004

Request & Response:

Request in bold:

Some of the roads in Bodmin where altered to reduce air pollution. In particular Dennison Road was the major road changed. Construction was completed in July 2018. I understand that their are pollution sensors on Dennison Road and other roads within Bodmin. I am interested in viewing the pollution readings on Dennison Road and any other sites in Bodmin after the completion of the work and also before completion. The work took about a year so I would be interested in the pollution readings in the same months between 2015 and 2019. The months that I would be interested in are March/April, August and November/December

The reason(s) you need the information if you think that this will help us to find what you want to know:

I want to compare air pollution before and after the road changes.

Response in plain text:

Please see the attached report. It doesn't cover the dates asked for, but is a preliminary analysis of the outcome of the Bodmin scheme.

The 2019 data is not published yet. We hope this will be published later in the summer.
