SIMS Interventions

Who is it for?

Anyone who wants to learn how to plan, create and run Interventions in SIMS and to report on their effectiveness.

Delegates will need to have some understanding of their schools strategies for Assessment, Attendance and Student Conduct, or the schools ambitions in these areas. This is a very practical course and will involve lots of discussion.

The course will cover:

- defining interventions, to capture and understand basic cost information
- setting up when the intervention will take place and who will run it
- allocating students to the intervention for a specific period of time
- adding an individual student to an Intervention
- recording a target for an individual student or group of students
- recording effectiveness for an individual student or group of students
- reviewing interventions against assessment data
- reporting on Intervention effectiveness and cost effectiveness
- analysis of interventions using Discover
- analysis of interventions using Assessment Marksheets
- creating reports of interventions using the reporting dictionary
- creating analysis reports to provide to Ofsted or an LA as evidence of which students have which interventions and which interventions are most effective
